

Erasmus+

Presenting our school on the twinspace

As we are part of the Erasmus+ project, our task was to make a movie or a presentation introducing the Schillerschule on the twinspace to show it to the other students of the project and maybe make them want to visit it later on.

In class, organised by one student, we thought about what we thought important for the others to know about our school and later, in groups of 4 to 5 students of our class, chose one aspect, such as the school in general, our bilingual teachers or the schoolyards, to present.

Planning the project included a lot of talking and thinking about how to realize our ideas and communicate with our group members and maybe compromise to reach the final aim, our presentation. This was not always easy, because we had to include everyone's ideas, but we managed this well and liked the work well.

We had a lot of fun, filming and cutting, setting the sound and of course finally watching the results, we were more than happy with.
